

# The Science of Responsive Air and Surface Purification

A Marsden Company

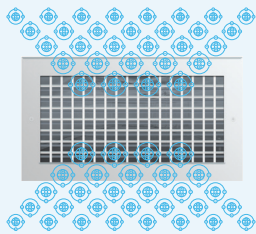

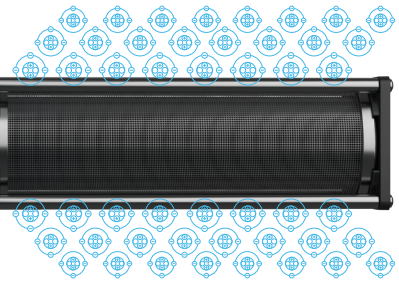

## How it Works

Sunstate offers the Marsden CleanAir system, powered by PuriFi Labs. This system uses a patented technology to safely remove particles from your air. The CleanAir system continuously monitors for particle concentration and works to purify the air and surfaces in your business.

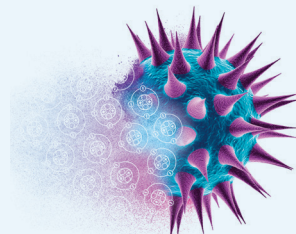

### Patented Process

When particulate levels are too high, the CleanAir sensor activates the CleanAir Generator, which is installed in your central HVAC system. The Generator uses a patented process to begin sending natural oxygen ions through all of your air ducts, which clean your air in minutes.

### Total Coverage

The technology uses a blend of high energy, oxygen ions flood every room and begin the purification process. Every register in your business becomes an air and surface purification system.

### Naturally Purified

The powerful ions attack air and surface contaminants, while driving particles out of the air and neutralizing odors.\*

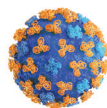

### 24/7 Monitoring

Purification is proven and monitored from anywhere. See your minute-by-minute air quality on your in-room CleanAir Sensors, or monitor and control your system from any smartphone, tablet, or voice assistant device.

## What it Eliminates

Patented technology safely eliminates up to 99.9% of tested viruses, allergens, odors, and bacteria in occupied environments.\*

### Biological Agents

Bacteria, Mold Spores, and Tested Viruses\*

### Odors

Pets, Smoke, Mildew, Mold, Cooking, Sports, and Fabrics

### Allergens

Pollen, Pet Dander, Dust, Lint, and Dust Mites\*

### Toxic Chemicals

Breaks down VOCs emitted from: Cleaning Products, Disinfecting Agents, Paints, Pesticides, Solvents, and Varnishes

## About Sunstate

Sunstate Mechanical Services is a full-service provider of HVAC, electrical, and plumbing services. We offer commercial and industrial solutions to a wide range of facility types and industries. Our clients range from small clinics to industrial parks covering millions of square feet and everything in between.
